- **Vitamins & Herbals**
- **Oral Healthcare**
A range of excipients for tableting, oral liquids and suspension products
- **Suppository Ingredients**
Including binders, hard fats and lubricants
- **Topical Healthcare**
Pharmaceutical grade PEGs, MCTs, emulsifiers, silicones and polysorbates
- **Preservation Systems**
Antioxidants, antimicrobial products and preservatives
- **Medical and Primary Packaging Materials**
Lubricants, siliconisation and radiopacity products

“Our strength is in our dedicated team’s experience and expertise in all aspects of pharmaceutical sourcing and supply.”

Innovative sourcing and supply

We offer active pharmaceutical ingredients (APIs), excipients and materials for pharma, medical and veterinary applications. Our strength is in our dedicated team’s expertise in sourcing and supply – from targeting value-added ingredients and product groups, manufacturer assessments, product evaluation and regulatory compliance, to specialist storage, packing and delivery, tailored to customers’ logistical and pricing needs.

Secure, safe re-packing and storage for peace of mind

Of additional value to customers and principals are our facilities for GMP repacking of APIs (class D clean room under laminar flow), excipient liquids and narcotics. Through fully compliant semi-automatic filling lines to manual filling of small units, quality control, storage and dispatch, we welcome manufacturers looking to consolidate secure supply routes to market. These facilities are led by a team of fully qualified experts covering all aspects of the business.

Quality & Regulatory Affairs

Our GMP/GTDP-certified sites licensed to import and distribute APIs, comply with EU legislation and are registered under the Falsified Medicines Directive. Our qualification procedures for every substance include assessment of manufacturers’ GMP, quality and regulatory documentation. Patient Safety is key and our GMP procedures throughout, ensure product integrity, batch traceability, and original documentation.

Azelis’ Regulatory Affairs team, including in-house Qualified Person, can help with: Registrations and registration dossiers, own and third party Certificates of European Pharmacopoeia (CEPs), evaluation and registration of Active Substance Master Files (ASMFs), GMP implementation, upgrades and audits. We also hold licenses for the import/export and supply of medicinal product intermediates (e.g. granules for direct tablet compression), drug precursors, narcotics and controlled drug substances with specially-secured stores at several sites.

We’re here to add value to your business and look forward to working with you.

Expert Sourcing Solutions

We are fully customer-focused and offer:

Product ‘baskets’ of related APIs

Consolidating your product requirements across specific therapeutic categories

Core and Value-Added Excipients

Providing a full range of established and innovative materials to improve product efficacy and create market differentiation

API and Excipient synergies

Offering ‘one-stop-shop’ supply of formulation ingredients

Pro-activity in market, therapeutic and patent analysis

Identifying new products and opportunities for your development programmes

Vendor rationalisation

– product supply & delivery consolidations

Let us look after your supply headaches

Backed by our Expert Sourcing from offices in Europe, China and India, we find the right materials from the right manufacturers.

Applications Laboratories

We have dedicated laboratories to support development of product formulations. For topical and flavour applications, we provide:

- Confidential supplier and customer specific projects
- Novel topical applications
- Development of effective flavour systems for oral dosage forms
- Pilot runs using our 3 kg vacuum reactor
- Microscopic analysis
- Product approvals

Market-leading speciality chemical and ingredient distributor
