

Azelis Chemicals

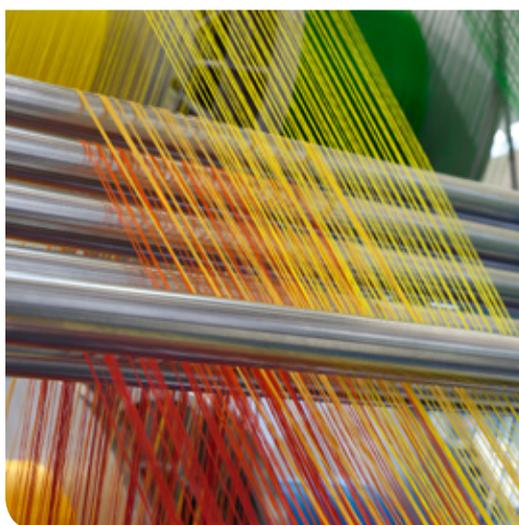

Creating value, growing together

Your chemical industries partner

Manufacturers, process and service providers need to constantly review and update their chemical inventory to improve performance, meet evolving environmental and quality standards, and maintain competitive advantage.

Azelis Chemicals offers a proactive service to international chemical customers. We can advise you on the best available solutions, source new chemicals from around the world, synthesise new compounds for specific applications and provide reliable global supply-chain and logistics.

Our product range includes

- **Essential Chemicals**
A wide range of commodity and base products and services
- **Fine Chemicals**
Advanced and basic synthesis intermediaries for fine chemicals and pharmaceuticals
- **Performance Chemicals**
An extensive range covering industrial, manufacturing and process applications
- **Agriculture & Horticulture**
An innovative range of products for agriculture, horticulture and farmcare markets
- **Electronics**
A comprehensive range of materials and accessories for the electronics industry
- **Salts**
An extensive portfolio covering food, pharmaceutical, industrial, water treatment and de-icing applications

“Azelis Chemicals can help you to find innovative, cost-effective, environmentally beneficial solutions, backed up with safe, reliable, fully compliant supply chain.”

Invaluable market insight, extensive product range

Azelis Chemicals is a leading distributor of speciality and commodity chemicals, with a comprehensive portfolio of innovative products for high-tech solutions.

Our extensive range of chemicals has been developed to meet the evolving demands of international chemical industries. Working from local offices, we can provide market intelligence, trends and advice for specific end-user markets. From agrochemicals and detergents, to roads and water treatment, you can rely on Azelis to help innovate, develop and enhance your products and processes. We can ensure you meet the highest environmental and quality standards, whilst improving value and delivering absolute reliability of supply.

Global reach, local delivery

Our global reach with quality principals is complemented by toll manufacturing and bespoke synthesis capability. Our international supply chain is fully compliant with control regulations and business standards for the storage, handling, transport and trading of chemicals.
