

Dear Customer,

Azelis supplies over 70,000 chemical products from over 3,000 suppliers to over 27,000 customers throughout Europe. Compliance with and communication on REACH is a vital part of our organisation.

Azelis confirms that it has all resources available to constantly monitor and verify that all the substances it supplies within the EU have either been REACH registered by Azelis or its suppliers, or are exempt from REACH registration.

In the case the product is a polymer imported into the EU market, we hereby confirm that all monomers forming the polymer in an amount of  $\geq 2\%$  weight by weight, as well as all additives have been registered by Azelis or by its suppliers.

For those products which are biocidal formulations the active ingredients are notified under Regulation (EC) No 528/2012 (EU Biocidal Products Directive, BPD) by Azelis or its suppliers and are considered as already registered under REACH (Art 15.2) for those applications within the scope of the BPD.

Registration numbers will be communicated through the supply chain by the Safety Data Sheet (SDS) or, when an SDS is not required, by any other documentation provided by the supplier to enable appropriate risk management measures to be identified. No additional communication of registration numbers is legally required.

We confirm that there are currently no plans to reformulate or discontinue any products because of REACH requirements. If there are changes in our supply plans as a result of REACH, we will inform you at the earliest possible opportunity and work with you to minimize any adverse impact thereof to the maximum extent reasonably possible.

Yours sincerely

Evy Hellinckx

Strategy & Business Development Director EMEA
